Professional Two Way Radio Accessories

5LWHS

Light Weight

The 5LWHS is an excellent all round lightweight accessory. The single ear pad provides a high level of comfort for extended periods of wear. The easily adjustable passive noise canceling microphone is very effective in reducing background noise. This product now includes our heavy duty polyurethane cabling, which has been upgraded in size for more durability.

6AVBH

Behind - The - Head

The model 6AVBH is a Behind-The-Head fitting model McKay headset. It utilizes an active noise canceling microphone. The unique design allows this model to be used with our WPTT Push-To-Talk assemblies for a wide range of popular two way radios. It is also compatible with our aviation leads.

6AVBH-ECS

Behind - The - Head with Earcup PTT

This is a Behind-The-Head mounting noise attenuating headset with an ear cup mounted PTT switch. Refer to our Cable and PTT section for compatible leads. These are especially popular in the car racing industry.

6AVOH

Over - The - Head

The 6AVOH shares most features with the 6AVBH headset. The two distinct differences are that this headset is an Over-The-Head mounting configuration and has blue colored ear cups.

6AVOH-ECS

Over - The - Head with Earcup PTT

This is a Over-The-Head mounting noise attenuating headset with an ear cup mounted PTT switch. Refer to our Cable and PTT section for compatible leads. These are especially popular in the car racing industry. These have blue coloured ear cups.

6AVOHS (ECS)

Over - The - Head Single Sided

The 6AVOHS and 6AVOH-ECS are Over-The-Head mounting headsets that have only one ear cup fitted. These are popular in the TV industry where clear audio is only required in one ear. When combined with one of our PTT switches or cable assemblies it is compatible with most two way radios.

7PR

Ear Hook Style 1

The 7PR ear hook with flexible boom is extremely good for long periods of wear. The unique ear hook removes the weight from the ear canal and the flexible boom microphone is easy to adjust for close placement to the users mouth. Suitable for moderately noisy night clubs and outdoor use.

9SB

Ear Hook Style 2

The 9SB ear hook with semi rigid boom is extremely good for long periods of wear. The unique ear hook removes the weight from the ear canal and the semi rigid boom microphone is easy to adjust to ensure user comfort.
